Never get caught off guard when your customer asks, "Why?" Recurrency's Dynamic Pricing Engine not only offers price suggestions, we tell you why we're suggesting them. Behind every price includes a list of factors that influence our suggestion: cost, inventory, time until expiration, expected number of incoming shipments, day of the week, season, weather, and popularity. Download the whitepaper to read more about our Dynamic Pricing Engine: https://recr.me/33uomwL

Happy New Year! 🎉

Did you know that January is named after the ancient Roman god Janus? As the god of gates, Janus could single-handedly combine the past, present, and future. Much like Janus, Recurrency works with your legacy ERP (past), analyzes its current data (present), and uses artificial intelligence (future) to offer on-point pricing and inventory order suggestions.

This 2022, let Recurrency take your ERP into the future: https://recr.me/3FQqAEw
